# GBES Bio-Composter

**GBES COMPOSTERS** are fully automatic Bio-Mechanical Composters. These can convert organic waste into nitrogen rich compost by reducing its volume by 65-80% of the original.

- Fully automatic In-vessel Composting Machine with a 15-day Retention time
- Produces highly nutrient NATURAL COMPOST and NOT Burnt Carbon
- Ideal for treatment of small quantities of segregated organic waste (25-1000 kg/day) using low power
- Uses forced aeration and mechanical agitation for rapid composting- Odour free process
- Suitable to replace manure and fertilizers for all agricultural needs
